- ✓ To support a data lifecycle in compliance with FAIR principles
 - ✓ Rethink data life cycle practices around data-sharing and propose a management model
 - ✓ Advance the maturity of data tools and services within the context of the data-sharing ecosystems
 - ✓ Address issues, such as data ownership, data provenance veracity and verification, decentralized data sharing, confidentiality and digital rights management, as well as processing energy efficiency
- ✓ To contribute to the minimization of the energy footprint
- ✓ To consider user needs and development of new business models

- ✓ The Operator Data space (Athens, Greece)
 - ✓ accelerate telecom operator's digital transformation & maintain effective revenue streams. A three-tier digital strategy: growing revenues from current services, growing strategic revenues and reducing costs
- ✓ The Energy Data space (Vienna, Austria)
 - ✓ holistic set of tools that will be developed in DataBri-X: enabler of a large-scale energy community data market. Part of the Aspern Smart City testbed
- ✓ The Legal Data space (Munich, Germany)
 - ✓ legal documents & knowledge Data space - to create smart services and tools on top of legal documents and other sources. Domain-specific tools and services made available to process legal information & gain insights
