# Group / market approach

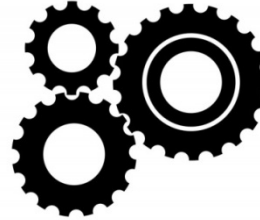

**DATA  
STRATEGY**

**ARCHITECTURE**

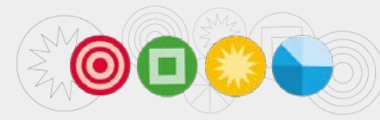

**AGILE  
ENGINEERING**

**AGILE  
DATA SCIENCE**

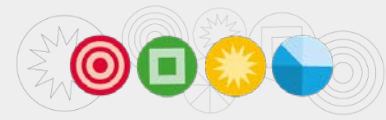

Professionals with specialized knowledge and skills on big data technologies and data science.  
Comprehensive set of consultancy and training services on project developments in various market domains.

Fulfill the emerging tech trends and market's analytical expectations  
Takes advantage of a wide network of academic, scientific, open source and market collaborations.

**Steady collaborations with SMEs** for mission-critical solutions and added-value services. Not only provide domain-specific knowledge and specialized support, but tend to be more flexible and quick to change, especially in the open source domain. Collaboration crucial to effectively face a competitive market, fast changing, global, and demanding, like never before.

**On the other side**, this offers SMEs the opportunity to have an impact not only on economic growth but also on social innovation, which nowadays is a key factor for those enterprises that are willing to increase their competitiveness, visibility and recognition at the international level.
